CASTLEBERRY, AL 36432

## INVITATION

GEC Organics has the pleasure of inviting you to participate in the Public Stakeholder Consultation of the project "*Avoidance of Methane Emissions at Organic Compost Soil Amendment Facility*" from GEC Organics, on Thursday, May 8 2014 at 10:00 AM. The Consultation will be held at the GEC Organics facility located at 630 Conecuh County Rd, Castleberry, Alabama. The Company converts chicken litter and green waste to organic, USDA certified compost by applying a proprietary microbe blend to break the material down aerobically. This results in very high quality soil amendment that restores the health of the soil while resisting erosion. The project will be developed as a Voluntary Emission Reduction (VER) Project under the Gold Standard registry generating Carbon Emission Credits. The purpose of this consultation is to present this project to our community and local businesses.

Time & Date: Thursday, May 8, 2014 @ 10 AM

Agenda:

- \* Welcome
- \* Presentation of project
- \* Impact on Sustainable Development
- \* Discussion
